

Hardtack Right-Up

Hardtack was used by mountain men because hardtack would not go stale and could last up to one hundred years. Hardtack was also helpful to mountain men because it was easy to make. I chose my final project for the school year and the Unit 3 project because I have heard about hardtack, that it is easy to make, and there are not many ingredients.

When I was researching different recipes and how to make hardtack, one video I watched said that there was some hard tack found that is centuries old and it is as edible today as it was when it was made. The links to the video that I watched about hardtack and how to make hardtack is shown here: <https://youtu.be/vy15R6yPvR4>
