# Life Science

Cody Carlson

The concept that I found most interesting was:

Dissecting the grasshopper and owl pellet fun.
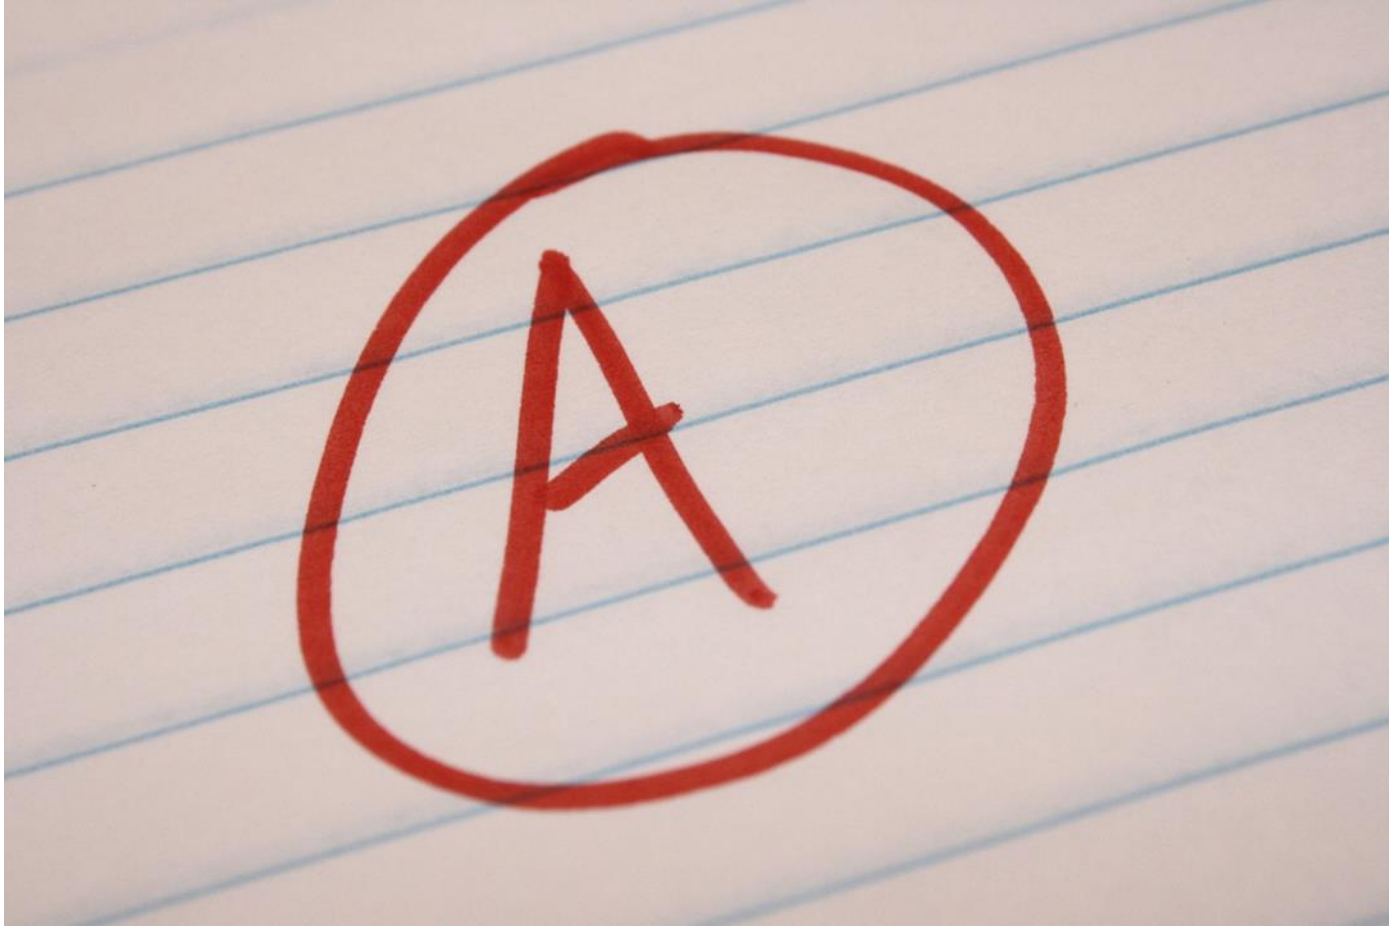

The concept that I found least interesting was:

Dissecting an orange

My grade in this class is an:

Overall my favorite part of this class was:

Dissecting

Something I did well this quarter was:

❖ My focus has improved.

❖ I don't blurt out as much.

❖ I turn my assignments in on time.

Below is a specific list of action steps I plan to take in order to improve my grade:

▸ less talking

▸ stay on task

To help me accomplish these steps, my teacher could help me in the following ways:

These are all independent.

My teacher feels that these additional suggestions would also help me improve my performance in class.

Cody could work on improving (even more than he's already done), staying focused on the task at hand. He could ask questions if he needs help. Cody has continued to improve in science class with his behavior and class participation.

Three examples of my work are:

antenna

leg muscles

thoracic ganglia

oesophagus

crop

gastric caecae

ventral nerve
cord

trachea

midgut

malpighian
tubules

digestive
tract

intestine

accessory gland

rectum

1. ventral body wall
removed

2. ventral nerve cord
removed

3 malpighina tubules
removed
