The concept that I found interesting was:

Although the whole quarter was fun, I enjoyed the time and colors chapter the most.

The concept that I found least interesting was:

The clothing unit.

An activity that I enjoyed was:

I enjoyed the color game, which is when Mrs. Schumacher would hold up a piece of paper and say it's color in Spanish, while we put that color on the left side of our desk and repeat this until all colors were used, then she would say in order, the colors that should be on our desk.

My grade in this class is an:

Three skills I did well this quarter are:

- I got my planner signed.
- I got my work turned in on time.
- I always have a positive attitude.

Below is a specific list of action steps I plan to take in order to improve my grade:

- I will study 5-10 minutes more than I do with the study sheet.
- I will check my work before the day it is due to make sure it is complete.
- I will use the book to answer questions on the study guide.

To help me accomplish these
steps my teacher can help me by:

My teacher can remind me to re-check my work right before I turn it in.

My teacher feels that these additional suggestions would also help me improve my performance in class:

You are very capable of getting a solid to high A in this class, but you need to focus and work more diligently in class in order to accomplish this. If need be, I can move you into the hallway to work if I feel you are distracted. It will probably help when we get back to having a regular schedule of class every day!

Three examples of work.
