

## Yellowstone Essay

Name: Cody Carlson

Date: October,17 2018

On September 19<sup>th</sup>, 2018 the 7<sup>th</sup> through 12<sup>th</sup> grades left Willow Creek Public school to go to Yellowstone National Park to learn about the different things such as Grand Prismatic Springs, Old Faithful, and the animals . I was amazed at how much wilderness there was there. There were three things that were very interesting to me: how steamy and explosive Old Faithful was, how colorful the Grand Prismatic Springs were, and how many animals there were.

When I first saw the little hill/mountain of Old Faithful I didn't think that it was much, however when I saw steam coming out of it I knew that it was cool. When it started to explode I was amazed. I was also amazed at how many other geysers were around it.

When I was on my way to Yellowstone National Park I saw antelope right before Ennis. When we were leaving Yellowstone National Park I saw some Buffalo and I was amazed how tame that they were because they were probably less than 20 yards away. When we were at Old Faithful I realized that there was a chipmunk underneath it and wasn't really afraid of people.

When I first saw the Grand Prismatic Spring I was amazed at how big it was, and when I was walking along the boardwalk I saw that it was very colourful and steamy, which was amazing. I was also amazed at how big Grand Prismatic Springs were; it would have been; neat to be John Colter and to see it for the first time back in the day.

Overall, Yellowstone National Park was a blast! I was amazed at how many animals there were, how steamy Old Faithful was, and how colorful the Grand Prismatic springs were. I hope I can go to Yellowstone National park again sometime soon.
